**Technology Development Lead at MyTap**

You are a talented lead developer who is detailed oriented, with sensitivity and talent for crafting functional, beautiful software with a specific passion for user experience. You see a future where you are managing a talented, motivated team of developers.

You understand that technology, design, and business come together to create highly successful companies and products, and you see yourself being part of a team with this core belief. You will be working closely with the Lead Designer and head of Business Development.

You will help the team at all stages of product design — from providing technology input into the design and user experience, to leading the technology team through scoping a feature, to planning the sprints, to development/code reviews, to quality control - testing, and to release deployment. If the thought of being the lead developer and gaining valuable management skills excites you, apply to come lead our company's technology team.

**Responsibilities:**
- Leading the development team of talented engineers
- Leadership and mentoring other engineers
- Technical architecture planning and support
- Release management
- Technical strategic planning
- Hands-on development

**Technical Skills:**
- Saas and customer relationship management application experience
- Advanced experience, 5+years with Java
- 2+ years experience with AngularJS 1.3+
- Software architecture
- General web application technologies, including HTML 5, CSS3/SCSS,, JavaScript, and Javascript libraries.
- Familiarity with developing web services APIs (REST, SOAP, XML, JSON)
- Familiarity with Micorservices built with Docker, Spring Boot, and using AWS for container deployment.
- Experience with PostgreSQL 9(preferred), or SQL Server 2012, MySQL, Oracle
- Experience building and managing continuous integration (Jenkins / TeamCity / Bamboo)
- Hybrid mobile apps: Ionic Cordova
- Third party APIs - Facebook, Twitter, Instagram, Square - POS integration

**Job Requirements:**
- Experience leading a multiple person development team/swim lane
- Ability to learn and evaluate new tools, concepts, and challenges quickly
- Experience with machine learning and recommendation systems

**Job Preferences**
- Experience with AngularJS 2 and Ionic 2
- B.S., M.S., or Ph. D in Computer Science or equivalent
- Experience at a startup
- Experience building a team
- Building microservices using Java, Spring Boot, and AWS

**If you are:**
- Passionate about design, technology, and building web-based products
- Analytical and creative
- Able to take the complex and find simplicity
- Excellent at communication and possess strong attention to experience consistency
- Resourceful, self-motivated, and able to work independently as well as collaboratively within a team
- Able to juggle numerous tasks and deadlines at once, turning deliverables around quickly
- Able to offer ideas/solutions when encountering roadblocks
- Able to absorb new information quickly and use knowledge gained to draw parallels to similar situations/circumstances
- Able to provide constructive feedback and give direction to fellow team members
- Someone who can quickly execute new ideas and present the results for evaluation
- Able to learn and evaluate new tools, concepts, and challenges quickly
- Willing to wear many hats
- Research-oriented
- Able to bridge the gap between design and technology
- **Someone who believes good enough doesn't end until there is a delighted customer**

**Why Us:**

We are changing the way people shop, focusing our efforts on the growing world of craft beer. Today, consumers are suffering from choice paradox, but with our platform they go from confused to confident as we provide them personalized recommendations.

As an early stage startup, you will be part of building the company. You will be helping the team define the direction for the company, be it our products or our business strategy.

If interested please send a resume, portfolio, cover letter, and 3 professional references to douglas@mytap.io. Include in the email title "Application for Technology Development Lead".
